DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 9, 2003 has been entered.

Claims 21-30 are pending and examined on merits.

Claim Rejections - 35 USC § 112

Claims 21-30 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant argues that the rejection is moot in view of the amendment. However, this argument is not persuasive because the amended claims recite "complete complements of SEQ ID NO:2." The specification does not teach how to make the multiple complete complements. Amending the claims "the complete complement^{o&} SEQ ID NO:2" would obviate this rejection.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 112

Claims 26-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are interpreted as drawn to an isolated polynucleotide encoding a protein ("open reading frame") or an epitope, wherein said polynucleotide is selected from the group consisting of SEQ ID NO:2 or the complete complement of SEQ ID NO:2. The specification at Figs. 1, 2, and pages 51-53 teaches instant SEQ ID NO:2 is an EST sequence. The specification does not provide any evidence of open reading frame in SEQ ID NO:2 or its complete complement. The specification does not teach what kinds of protein or epitope is encoded by instant SEQ ID NO:2.
